

12. (New) The coated metal plate according to claim 10, wherein the plastic film or sheet has a thickness in a range of 3 to 75 μm .

13. (New) The coated metal plate according to claim 10, wherein the plastic film or sheet contains a conductive substance in the plastic film.

14. (New) The coated metal plate according to claim 12, wherein the plastic film or sheet has a volume specific resistance value of $10^3 \Omega \cdot \text{cm}$ or less.

15. (New) The coated metal plate according to claim 10, wherein the plastic film or sheet has a conductive layer on the surface of the plastic film or sheet.

Al Cont
16. (New) The coated metal plate according to claim 15, wherein the plastic film or sheet has a surface resistance value of $100 \Omega/\square$ or less.

17. (New) The coated metal plate according to claim 10, wherein the electrodeposition film is formed from a cationic electrodeposition paint.

18. (New) The coated metal plate according to claim 17, wherein the cationic electrodeposition paint contains a base resin having a hydroxyl group and an amino group which can be converted to a cation and an aliphatic block polyisocyanate compound.

19. (New) The coated metal plate according to claim 10, wherein the electrodeposition film has a thickness in a range of about 10 to about 40 μm .

20. (New) The coated metal plate according to claim 10, wherein the electrodeposition film has a thickness in a range of 10 to 20 μm .

21. (New) The coated metal plate according to claim 10, wherein the plastic film or sheet is adhered to the metal plate using an adhesive.

22. (New) A coated metal plate, comprising a metal plate, a preformed conductive plastic film or sheet, and an electrodeposition film.

23. (New) A car body, comprising the coated metal plate according to claim 10.

24. (New) A car body, comprising the coated metal plate according to claim 22.

25. (New) An article of manufacture, comprising the coated metal plate according to claim 10.

26. (New) An article of manufacture, comprising the coated metal plate according to claim 22.

27. (New) A method for manufacturing a coated metal plate, which comprises adhering or pressing a preformed conductive plastic film or sheet on a surface of a metal plate, and then electrodepositing an electrodeposition paint on the plastic film or sheet to form an electrodeposition film.
